Signal Form Limitations

Not a drop-in replacement

Imperative vs. declarative

Complex form migrations are not a must

Still experimental!

Third-party support may not exist yet

Best Practices

Keep behavior
in schema

Model signal is the
source of truth

Don't create duplicate
form state

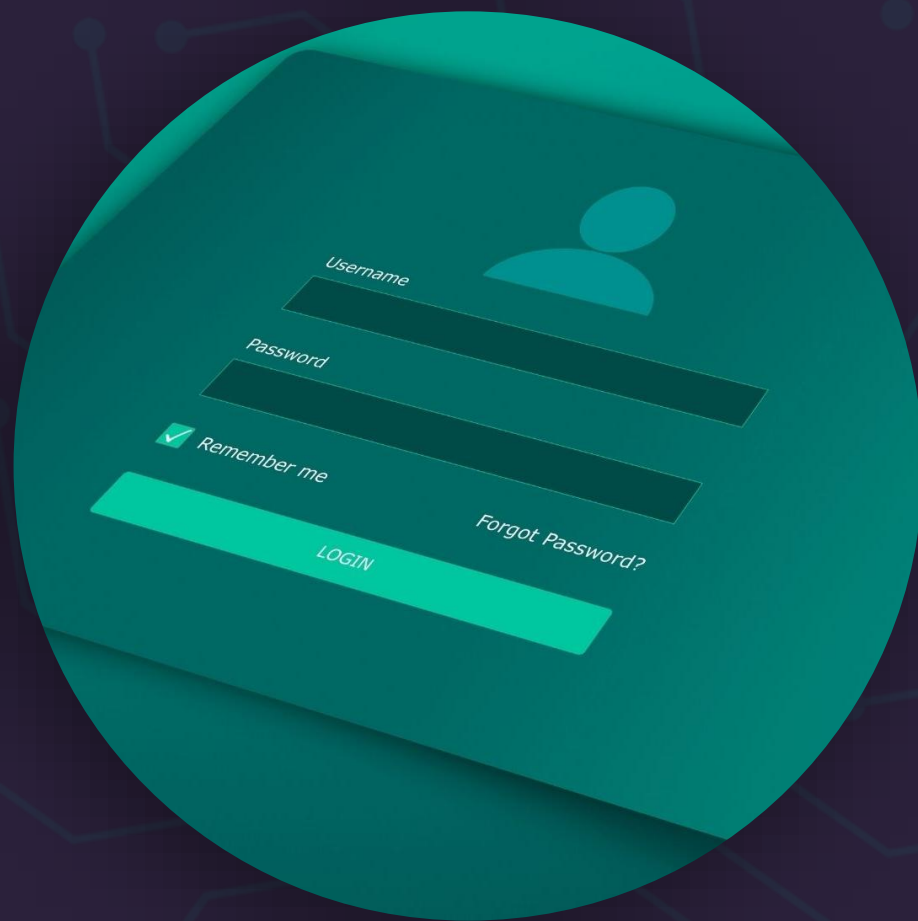

Migration Strategy

New forms or simple, isolated forms

Different form types can coexist

No rush to replace older, stable forms

Migrate when it makes sense

Modern Form Lifecycle

Model the data

Validation

Dynamic behavior

Submission

Server failures

Thank You!
